

LUNA: AUTOMATIC STAND-ALONE SPRINKLER EXTINGUISHER

Product Specifications

Range

The LUNA is available
1 to 9 Liters

Certification

The LUNA has the European
EN3 certificate and CE certificate.
The agent inside has the
Eco-toxicologic certification 0580460/20

Fire classes: A; B; F and Lithium-Ion

3L and more Self-standing Automatic Extinguisher

The LUNA is designed to be self-standing, offering convenience and ease of use. This feature ensures quick access and deployment in the event of a fire, providing immediate protection to the users and surroundings.

CE-PED Certified

The LUNA meets stringent safety standards with an activation temperature of 64°C. This certification assures users of its reliability and effectiveness in combating fires, offering peace of mind in fire emergencies.

Modular Application

Each unit covers 16m³ and can be combined to cover larger areas as needed. This modular approach provides adaptability and scalability, allowing for customizable fire protection solutions in various environments and spaces.

Activation

The LUNA automatically activates at 64°C to extinguish fires quickly and effectively. This rapid response ensures the containment and suppression of fires, mitigating potential damage and harm.

Non-Toxic / 100% bio (the only one in the world with 100% bio)

Safe for humans, animals, and the environment, making it suitable for use in homes, offices, and other sensitive areas. The non-toxic composition of the extinguishing agent prioritizes the well-being of both occupants and the surrounding ecosystem.

Suitable for various applications

Home batteries: electrical bikes- drones / **Offices**: battery storages, bike garage

Commercial spaces, ensuring comprehensive fire safety/**Technical areas**: machines rooms, elevator shafts, emergency entrances and exits, containers, battery storage.
